

# Understanding & Measuring Current: European Vehicles

*with Adam Robertson*

- **Description and operation of solenoids & various motors**
- **Proper setup for oscilloscopes and probes**
- **Relationship of electrical laws to diagnostic scope captures**
- **Using current ramping for circuit diagnostics of injectors, solenoids, coils & fuel pumps**
- **Measuring current of computer networks**
- **Diagnose component failures before disassembly**
- **Suitable for technicians of all skill levels**

**SAT 07/12/2025**

**8:00AM ~ 12:15PM (PDT)**

**11:00AM ~ 3:15PM (EDT)**

**CLASS ID: OLT434**

**Cost: \$150**
