

Network Diagnostics: Bits & Bytes

Instructor:
Adam Robertson

Network diagnostic communication fault strategies that work in the bay, from network code direction to circuit-level signal verification

- Vehicle Network Operation and Module Communication
- Network Code Research, Protocol Identification and Service Information Application
- Network Protocols, Topology Layouts and Communication Paths
- Circuit Fault Analysis - Opens, Shorts, Resistance and Voltage Concerns
- Module Failure Evaluation without Unnecessary Disconnecting or Replacement
- Advanced DVOM and Oscilloscope Techniques for Network Signal Verification

**Saturday
12/5/26**

8am to 5pm

Code: **SEM2020**

Cost: **\$385 USD**

Per Student

**Foreign Car Specialists
South Campus
1937 South Road
Poughkeepsie, NY 12601**
